

The GenuDo AI Workforce

Aaref · Adnan · Roz

Three AI employees, one team

How Aaref (sales), Adnan (customer service and success) and Roz (quality control) work together for your business — from the first message to a customer who stays, and a team that keeps improving. Start with any one of them, or hire all three.

From first look to first results

1 Meet your AI workforce

Three AI employees, each hired for one part of your business. Each works on its own — and together they cover the whole customer journey.

Aaref

AI Sales Employee

BEFORE THE SALE

- ✓ Answers every inquiry in seconds, day and night
- ✓ Qualifies and follows up until the customer decides
- ✓ Closes the next step: a booking, a registration, an order or a request to your team

→ Start here if inquiries wait and ads don't pay back

Adnan

AI Customer Service & Success

AFTER THE SALE

- ✓ Answers customers instantly from your own information
- ✓ Handles routine requests by your policy, any hour
- ✓ Hands difficult cases to your team with full context

→ Start here if customers wait for answers after they buy

Roz

AI Quality Control Employee

YOUR TEAM'S CONVERSATIONS

- ✓ Connected to your company WhatsApp chats and groups
- ✓ Answers your questions and sends reports through Claude or ChatGPT
- ✓ Ready the same day with one QR scan — no setup

→ Start here if you can't see what your team says on WhatsApp

One platform behind the whole team — on the web, iOS and Android

One inbox

Every channel and every conversation in one place.

Pipelines

Aaref and Adnan move customers through your stages.

Take over in one tap

Pause the AI on any chat and reply yourself.

iOS and Android apps

Follow every conversation on the go.

Dashboard

Leads, funnel, follow-ups and AI cost per stage.

Claude and ChatGPT

Ask, schedule reports and build dashboards from your AI assistant.

Start with one, or hire all three

One platform and one account manager. Each employee adds value from day one; together they turn every conversation into revenue, customers who stay and a team that keeps improving.

2 One customer, three employees

One week at an invented online academy in Cairo. Every name and number is invented.

Sun
11:40 PM

A parent asks about the coding course

On Instagram, after office hours. Aaref answers in seconds — levels, start date, installments — and registers her son in Saturday's group. The registration lands in the academy's sheet and the sales WhatsApp group.

✓ Registration closed at midnight

Mon
9:00 AM

The team starts with registrations, not questions

The advisor calls only to welcome the family; every detail is already on record.

✓ Hours back for the team

Sat
7:56 PM

Five minutes before the first live session, the link doesn't work

The student sends a voice note. Adnan sends tonight's working link from the academy's schedule and informs the course coordinator.

✓ The student joins on time

Sat
9:00 PM

A strong start

After the session, Adnan sends the student page, the first assignment and the next session date.

✓ A customer who stays

Mon
9:00 AM

The weekly report arrives — scheduled in Claude

From the advisors' WhatsApp numbers and the parents' group: 2 parents waited more than 3 hours, an installment plan was promised and not sent, and 14 parents asked about certificates.

✓ The owner sees what was invisible

Mon
10:00 AM

The report becomes action

The advisor sends the plan. With the account manager, the certificate answer is added to Adnan's knowledge — so the next parents get it instantly.

✓ The whole team improves

Without the team

The parent registers with a competitor before morning, the student misses the first session, and nobody hears about the unsent plan until the month's numbers come in.

With the team

A registration at midnight, a student who joins on time, a report that shows what was invisible — and a new answer that saves the team time every week.

3 How they work together

Each employee owns one part of the customer journey. What one of them shows makes the others better.

Aaref brings the customer

Every inquiry answered, qualified and closed.

Adnan keeps the customer

Answers, requests and a strong start after the sale.

Roz shows your team's side

Reports on your team's own WhatsApp chats and groups.

You improve all three

With your account manager, month by month.

PART OF THE JOURNEY	WHO	WHAT HAPPENS	WHAT YOU SEE
 Before the sale	Aaref	Answers in seconds, qualifies, follows up and closes the next step	Conversions, response time and cost per conversion on the dashboard
 After the sale	Adnan	Answers from your information, handles requests by policy, onboards and escalates	Questions resolved, escalations and team hours saved
 Your team's WhatsApp	Roz	Keeps your team's chats and groups on record, answers your questions and sends scheduled reports	Reports and dashboards in Claude or ChatGPT
 Your team	Your people	The cases that need a person — and any chat they choose to take over in one tap	The GenuDo inbox and the iOS and Android apps

 Your team stays in control

You approve the answers, choose who receives handed-over chats, and can take over any conversation in one tap — on the web or the apps.

 One account manager for all three

One point of contact who plans with you, reviews the numbers every month and keeps the three employees working as one team.

 Stronger together

Roz's reports show the questions customers keep asking and where your team loses deals. Your account manager turns them into better answers for Aaref and Adnan — so the whole workforce improves every month.

4 Start with any one — or all three

You don't need all three on day one. Start where the problem costs you most, and add the next employee when you're ready.

IF THIS SOUNDS FAMILIAR

- Inquiries wait until the morning
- Ads bring chats that nobody answers
- Interested customers are never followed up

Start with Aaref

First result on day 1: every inquiry answered in seconds

IF THIS SOUNDS FAMILIAR

- Customers wait for answers after they buy
- Your team repeats the same answers all day
- New customers start slowly, or not at all

Start with Adnan

First result on day 1: answers in seconds, any hour

IF THIS SOUNDS FAMILIAR

- You can't see what your team says on WhatsApp
- Deals stall and promises slip without anyone noticing
- You read chats at night to know what happened

Start with Roz

Ready the same day, smaller packages; first reports in week 1

IF YOU WANT THE WHOLE JOURNEY COVERED

- Every inquiry answered and closed
- Every customer served after the sale
- Every team conversation visible

Hire all three

One platform and one account manager for the whole journey

One possible path — every business is different

Week 1 — Roz: see where your team's conversations slip

Month 1 — Aaref: answer and close every inquiry

Month 2 — Adnan: keep every customer after the sale

Every month — one review of all three with your account manager

at your own pace

However you start

The numbers are agreed with you before anything starts, and reviewed every month with your account manager. Each employee's own profile has the detail.

5 The team it would take

What the same work would take with people — under Egypt's 48-hour working week and an invented volume of 300 team chats a day.

THE JOB	WITH PEOPLE	WITH GENUDO
 Answering leads around the clock	4–5 people for one seat [1]	Aaref, all 168 hours
 Serving customers around the clock	4–5 people for one seat [1]	Adnan, all 168 hours
 Reviewing every team chat	3 full-time reviewers for 300 chats a day	Roz, every chat and group on record
 In total	11–13 people, plus 18.75% social insurance, overtime and 30–40% yearly turnover [2][3]	3 AI employees — and your team for what needs a person

 **A human team for the same work**

- 11–13 hires to cover sales, service and quality review
- Employer social insurance: 18.75% on each insured wage [2]
- Overtime at +35% by day and +70% at night [1]
- 30–40% of service staff leave every year; 3–6 months to reach full speed [3]
- 2–3 chats at a time per person before quality drops [4]
- Gaps at night, at weekends and in peak seasons

And every shift answers a little differently.

 **The GenuDo AI workforce**

- Aaref and Adnan cover all 168 hours
- Roz keeps every team chat and group on record
- No shifts, no turnover, no re-training
- Peak seasons without temporary hires
- One standard, every time
- Built and looked after by GenuDo; Roz ready the same day

Your team keeps the work that needs a person.

 **Not a replacement for your team — the hours they never had**

The AI workforce covers the nights, weekends, repetitive questions and the reading nobody has time for. Your people keep the conversations and decisions that need a person.

6 The business value

Research on response speed, service and quality points the same way — and each employee works on one of these numbers.

ROI = (revenue protected + customers kept + revenue rescued + value of hours saved – the plans you choose) ÷ the plans you choose

Your numbers, not ours

Each employee's profile has a worked example and a worksheet that your account manager fills in with your numbers.

7 How we work with you

We are not a tool you set up alone. We join you, listen, and plan with you what each employee does — and what stays with your team.

 **Aaref and Adnan — built for your business**

- We listen: a discovery session on your customers, channels and offers
- We plan together: what each one does, what stays with your team, the numbers we track
- We build: our automation specialist builds them on your knowledge, stages and tools
- We launch: real scenarios tested with your team, each step approved by you
- We improve: your account manager reviews the results with you every month

Built around how you sell and serve.

 **Roz — ready the same day**

- Log in to your GenuDo account
- Scan a QR code from each company WhatsApp number
- Chats and groups linked from that moment
- Ask and schedule reports in Claude or ChatGPT, connected to GenuDo
- Build the dashboards your business needs; your account manager looks after the relationship

No build and no setup time.

WHO	THEIR PART
 You, the business owner	Share how you sell and serve, approve the plans and answers, and act on what the reports show.
 Your GenuDo account manager	One point of contact for all three: plans with you, reviews results and keeps every employee in step with your goals.
 Your GenuDo automation specialist	Builds and tunes Aaref and Adnan: knowledge, stages, follow-ups and the connections to your tools.
 Claude or ChatGPT	Your AI assistant, connected to GenuDo: answers your questions about Roz's conversations, runs scheduled reports and builds dashboards.

8 Our first 90 days together

Counted from go-live for Aaref and Adnan, and from the QR scan for Roz. Your account manager writes today's numbers and the targets with you.

WHAT WE MEASURE	WHO MOVES IT	TODAY	TARGET	REVIEWED
 First response time	Aaref and Adnan			Weekly
 Conversions	Aaref			Monthly
 Resolved without staff	Adnan			Weekly
 Customers kept	Adnan			Monthly
 Customers your team left waiting	Roz's reports			Weekly
 Team and owner hours saved	All three			Monthly

 **What we need from you**

Your price lists, policies and FAQs for Aaref and Adnan; a QR scan from each company number for Roz; who receives handed-over chats and reports; and your feedback in the first two weeks.

 **What you get from GenuDo**

A planning session before Aaref and Adnan are built; an automation specialist who builds and tunes them; Roz ready the same day; one account manager for all three; and the dashboard, apps and Claude or ChatGPT connection to see everything.

9 A note from your new team

To the owner of the business we're about to join,

Thank you for reading about us. Between us, we cover the whole customer journey: Aaref answers and closes, Adnan serves and keeps, and Roz shows you how your own team is doing.

Here is what we'll give you: no inquiry left waiting, no customer left without an answer, and no team conversation you can't see — with your people focused on the work that needs a person.

Here is how we'll know it's working: we'll write down today's numbers together and review them every month with your account manager.

Start with the one you need most, or with all three. Let's grow your business together.

Aaref, Adnan and Roz

Your AI workforce

Your GenuDo account manager

One point of contact for the whole team

What we give

Every inquiry answered, every customer served, every team conversation visible.

How we measure it

Response time, conversions, customers kept and your team's reply times — against today's numbers.

When you see it

Day 1 in your inbox and Roz's link, week 1 in your first reports, month 1 in your numbers.
