built for your business
See what you need to see.

2 Job description

Responsibilities

-  Stay connected to your numbers
-  Keep every conversation on record
-  Answer your questions
-  **Send scheduled reports**

Time to value

-  Day 1 — one QR scan; chats and groups linked from that moment
-  Week 1 — first scheduled reports: waiting customers, slow replies, open promises
-  Month 1 — your dashboard, and a first review with your account manager
-  **Quarter 1 — a faster, more consistent team and an ROI review**

3 What it takes to review every chat — and the employee who does it

Reviewing by hand

-  A supervisor reads a sample — or you read at night
-  Problems surface after the customer has gone
-  Voice notes get skipped: too slow to listen to
-  **And the hours come out of selling and managing.**

Roz

-  Every chat and group on the numbers you link
-  Answers in Claude or ChatGPT, in plain language
-  Reports on your schedule; dashboards built for you
-  **You manage by exception, not by reading.**

How Roz starts with you

No build and no setup time. Log in to your GenuDo account, scan a QR code from each company WhatsApp number, and Roz is on the job the same day. Your account manager looks after the relationship with you.

under 5% — Chats a manager can review
