From first look to first results

1 Meet Roz

Your view of every company WhatsApp conversation — through the questions you ask and the reports you schedule.

READY FROM DAY ONE

Roz روز

AI Quality Control Employee · Connected to your company WhatsApp chats and groups; answers your questions and sends your reports through Claude or ChatGPT

📍 Works on the company WhatsApp numbers and groups you link

DEPARTMENT

Quality control and operations

WORKING HOURS

Always connected; reports on the schedule you set

WORKS WITH

Your team and your AI assistant, alongside Aaref and Adnan

NAME

Roz means “rose”: care your customers can feel

REPORTS TO

You — the owner or operations manager

LANGUAGES

Arabic and English chats; voice notes in writing

PACKAGE

Smaller packages than Aaref and Adnan — the easiest first hire

STARTS

The day you scan a QR code — no setup

About

I'm Roz. I'm connected to your company WhatsApp numbers — the one-to-one chats with customers and suppliers, and your WhatsApp groups. Every conversation on the numbers you link is on record, so you know what is happening without reading a single chat yourself.

I don't step into chats or reply to anyone. You ask, and I answer — through Claude or ChatGPT, connected to GenuDo: who waited too long, what was promised and not sent, which deals stalled. Schedule a report every morning or every week, and build the dashboard your business needs. I'm here to help your team improve, not to catch anyone out.

VISIBILITY

Coverage

Every chat

and group on the numbers you link

Not a sample.

ANSWERS

Questions

Ask anything

in Claude or ChatGPT

In plain language, about any day.

Reports

On schedule

daily or weekly

To whoever needs them.

Dashboards

Your own

built for your business

See what you need to see.

2 Job description

Written the way you would post the role on LinkedIn: what Roz is hired to do, the skills she brings, and the rules she works by.

Responsibilities

-  **Stay connected to your numbers**
Company WhatsApp numbers — one-to-one chats and groups — from the moment you scan.
-  **Answer your questions**
Through Claude or ChatGPT: any number, any customer, any day.
-  **Show who waited**
Customers left without a reply, slow responses, after-hours chats.
-  **Feed your dashboards**
Built through Claude or ChatGPT around what you need to see.
-  **Keep every conversation on record**
Customers, suppliers and team groups; voice notes in writing.
-  **Send scheduled reports**
Daily or weekly, at the time you set, to the people you choose.
-  **Show what stalled**
Promises not kept, follow-ups forgotten, deals left open.
-  **Give coaching insights**
Repeated issues and what wins, so your team improves every week.

Skills & capabilities

-  Chats and groups
-  Voice notes in writing
-  Response-time tracking
-  Opportunity spotting
-  Scheduled reports
-  Custom dashboards
-  Categorising on request
-  Ready with one QR scan

Tools Roz works with

-  Your company WhatsApp numbers
-  Your WhatsApp groups
-  WhatsApp Linked devices (one scan)
-  Claude or ChatGPT, connected to GenuDo
-  GenuDo on the web and apps

Works with your team

Roz works alongside your people, not over them. Her reports show your sales and service staff what to fix, and bring you what needs a decision. Where Aaref and Adnan answer customers, Roz shows you how your human team's own conversations are going.

Rules of the job

Works only on the numbers and groups you link. Works in answers and reports, not live alerts: she never replies to customers or steps into a chat. Coaches, never shames — insights are about conversations, not people. Use her openly: tell your team Roz is there to help them win more.

3 How Roz works your business

Where Roz sits in your operation — and one day of her reports at an invented real-estate brokerage.

Numbers linked

One QR scan per company number.

Conversations on record

One-to-one chats and groups; voice notes in writing.

You ask

In Claude or ChatGPT, in plain language.

Reports on schedule

Daily or weekly, to whoever needs them.

The team improves

Each report shows what to fix and how to win more.

Claude or ChatGPT · connected to GenuDo

Scheduled report · every day, 9:00 AM · invented example

Morning report: what happened on the sales numbers yesterday?

- 3 customers waited more than 2 hours for a first reply — 2 of them after 6 PM.
- Karim promised Hany S. the payment plan for unit B-14. It hasn't been sent.
- 2 buyers asked about installments and got no follow-up.
- Contractors' group: the phase-2 handover photos are 3 days late.
- Coaching: 6 buyers asked for the payment plan in their first message — send it with the first reply.

Sent to the sales manager every day at 9:00 AM

9:00 AM

The morning report arrives

Scheduled in Claude: yesterday's waiting customers and open promises.

9:05 AM

The sales manager asks a follow-up

"Show me Karim's chat about unit B-14." The answer comes back in seconds.

9:30 AM

The plan goes out

Karim sends the payment plan and books a site visit.

1:00 PM

The owner checks the dashboard

Response time per number and promises kept — built for this brokerage.

Sunday

Weekly report and coaching

Repeated issues across the team, and what to change this week.

Without Roz

Hany waits, gets a promise, and the plan never arrives. He buys through the broker who followed up. Nobody notices until the month's sales come in short.

With Roz

The next morning's report shows the open promise. The plan goes out, the visit is booked — and the weekly report turns the fix into a habit for the whole team.

How GenuDo helps here

Roz links to each company WhatsApp number with one QR scan (WhatsApp → Linked devices). From then on you ask about any conversation in Claude or ChatGPT, connected to GenuDo, and schedule the reports you need. Nothing changes for your customers.

4 The business value of hiring Roz

Most owners can't see what happens in their team's chats until a customer complains or the month's sales come in short. Research on follow-up and service quality shows how much slips through.

MCKINSEY 2024

Chats a manager can review

under 5%

of conversations get a manual quality check

Often around 2–5% [1][2]

HBR AUDIT

Inquiries never answered

23%

of 2,241 firms never replied

Those that did took 42 hours on average [3]

CEB / HBR

Better coaching

+6–8%

rep performance from better-than-average coaching

Up to 19% with the best coaching [4]

ZENDESK 2025

One bad experience

63%

would switch to a competitor after just one

CX Trends 2025 (vendor) [5]

Revenue rescued

Stalled deals and waiting customers show up in the next report, while they can still be saved.

Deals followed up from reports × close rate × average deal

Faster replies

When response times are reported every week, they drop — and faster replies win more sales.

Team response time — before and after

A team that improves

Reports on real conversations coach every person, every week.

Repeated issues and conversion, number by number

Owner time back

You ask one question instead of reading chats at night.

Hours a week you spend checking chats

Sources: [1] McKinsey 2024 — AI in quality assurance · [2] COPC 2026 · [3] HBR 2011 — The Short Life of Online Sales Leads · [4] HBR 2011 — The Dirty Secret of Effective Sales Coaching · [5] Zendesk CX Trends 2025

5 What it takes to review every chat — and the employee who does it

Checking your team's conversations by hand doesn't scale: a person reviews a sample, a few chats a day. Here is the arithmetic.

Reading every chat by hand would take a team

300 chats a day × 5 minutes = 25 hours of reading — three full-time reviewers, before a single coaching note is written. Invented example; we recount it with your volume.

Reviewing by hand

- A supervisor reads a sample — or you read at night
- Problems surface after the customer has gone
- Voice notes get skipped: too slow to listen to
- Feedback depends on who reviews, and when
- Staff feel watched, not helped
- Night, weekend and group chats go unseen

And the hours come out of selling and managing.

Roz

- Every chat and group on the numbers you link
- Answers in Claude or ChatGPT, in plain language
- Reports on your schedule; dashboards built for you
- One standard for everyone
- Insights that coach, never blame
- Smaller packages, ready from day one with one QR scan

You manage by exception, not by reading.

Not a replacement for your managers — the time they never had

Roz does the reading nobody has hours for, so your managers spend their time on the coaching conversations and decisions only they can make.

Sources: [1] McKinsey 2024 — manual QA covers under 5% of conversations

6 Measuring the return

ROI is agreed with your account manager and measured every month. The worked example uses an invented brokerage with six sales agents; the right-hand column is for your numbers.

ROI = (revenue rescued + value of manager hours saved + customers kept – Roz's plan) ÷ Roz's plan

MONTHLY FIGURE	INVENTED EXAMPLE	YOUR BUSINESS
Customer chats on company numbers sales and service	3,000	
Deals that stall plans promised and never sent, no follow-up	40	
Stalled deals followed up from the reports assume 1 in 4	10	
Your close rate on those deals	20%	
Average value of a deal to you commission or margin	25,000 EGP	
Hours you or a manager spend checking chats per week	5	
Extra deals closed 10 × 20%	2	
Revenue rescued 2 × 25,000 EGP	50,000 EGP	
Manager hours back 5 hours × 4 weeks	20 hours	
Monthly value to compare with Roz's plan	50,000 EGP + 20 hours	

How to read the example

Every number in the middle column is invented to show the method — it is not a forecast. In the first weeks the reports show how many chats wait and how many deals stall; your account manager uses those real numbers to fill the right-hand column with you.

7 Industry use cases

The six industries on genudo.ai, plus three where teams sell and serve on WhatsApp. For each: the problem, Roz's job, and the number to watch.

 Clinics & healthcare A FRONT DESK THAT ANSWERS ON TIME	
THE PROBLEM Booking messages answered late, prices quoted inconsistently, patient chats on receptionists' personal phones.  A patient asks a Nasr City dental clinic about implant prices at 9 pm. The reply comes next afternoon; her voice note about pain is never escalated. 82% of patients give a provider only one or two chances before switching; a bad front-desk experience is a deal-breaker for 46% [Tebra 2025, vendor].	WHAT ROZ DOES ✓ Reports patients left waiting, and messages that arrived after hours ✓ Puts voice notes in writing, so the urgent ones stand out in the report ✓ Shows where the front desk's tone, accuracy and follow-through slip
MEASURE Front-desk reply time Patients left waiting Requests followed through	
 E-learning & academies ADVISORS WHO FOLLOW UP	
THE PROBLEM Inquiries read and left unanswered, undecided learners never followed up, advisors quoting different installment plans.  Before the September cohort, three advisors at a Cairo bootcamp quote three different installment plans; parents asking about certificates are read and left unanswered. 44% of inquiries to continuing-education units got no reply [UPCEA 2025]; only 1 in 6 UK university inquiries got a follow-up [ICEF 2021].	WHAT ROZ DOES ✓ Reports inquiries left unanswered ✓ Lists undecided learners nobody followed up ✓ Shows advisors what wins registrations
MEASURE Advisor reply time Follow-up rate Inquiry-to-registration	
 Fitness centers & gyms A FRONT DESK THAT SELLS	
THE PROBLEM Trial visitors never called, prices quoted differently, member questions unanswered for days.  A Sheikh Zayed gym launches a summer offer: three prices on WhatsApp, trial visitors never called, a member's question unanswered for a week. Only 35% of prospects were contacted within the club's own target, and they were asked to join only 56% of the time [UK mystery shop, 500+ clubs].	WHAT ROZ DOES ✓ Reports trial visitors and prospects with no follow-up ✓ Shows member questions left unanswered ✓ Coaching insights so the desk asks for the sale
MEASURE Follow-up within 48 h Trial-to-member rate Questions answered

Marketing agencies

CLIENT GROUPS THAT STAY WARM

THE PROBLEM

Slow replies in client WhatsApp groups; relationships cool without the owner noticing; account managers leave with the chat history.

🕒 *A client asks in the WhatsApp group for last week's ad report on Thursday and hears nothing until Sunday. The account manager resigns; the history leaves on his phone.*

Lack of attention or responsiveness was the second most common reason clients fired an agency; 50% had fired one in two years [AMI via HubSpot].

WHAT ROZ DOES

- ✓ Reports client questions waiting in your groups and on company lines
- ✓ Shows accounts going quiet before the client leaves
- ✓ Reply times per account, so you act early

MEASURE

Client reply time

Accounts at risk

Client retention

Hospitality & tourism

ANSWERS THAT BOOK THE ROOM

THE PROBLEM

Partial answers, no alternative offered when dates are full, rates quoted differently by each agent.

🕒 *A Hurghada resort answers a family's rate question but ignores the transfer and all-inclusive questions — and offers nothing when the dates are full.*

Only 44% of multi-question requests got a complete answer, and 42% of exchanges ended with no alternative offered [Lobby 2026, vendor].

WHAT ROZ DOES

- ✓ Reports guests waiting for a reservations reply
- ✓ Shows unanswered questions and missed alternatives
- ✓ Coaching insights toward complete, booking-ready answers

MEASURE

Complete answers

Reservations reply time

Inquiry-to-booking

Camps & events

NO PARENT LEFT UNANSWERED

THE PROBLEM

Registration peaks bury coordinators in voice notes; some parents get answered twice, others never.

🕒 *A North Coast summer camp receives about 200 parent voice notes about buses and allergies in one weekend. Some parents are missed completely.*

No sector study exists — but across audits, 23% of businesses never replied to an inquiry at all [HBR 2011].

WHAT ROZ DOES

- ✓ Puts every parent voice note in writing
- ✓ Reports parents nobody answered during the rush
- ✓ Lists unfinished registrations to chase

MEASURE

Parents answered

Peak-week reply time

Registrations completed

**Real estate**

BROKERS WHO FOLLOW THROUGH

THE PROBLEM

Leads wait days for a promised call; plans promised are never sent; agents leave and take their clients with them.

🕒 *A New Capital agent promises a call and a payment plan; two days later, neither has happened — and the buyer is talking to another broker.*

68% of website inquiries got no response within 24 hours [Pied Piper, Oct 2026]; 62% of open-house visitors got no follow-up [DelPrete 2024].

WHAT ROZ DOES

- ✓ Reports promised calls, plans and brochures not sent
- ✓ Shows buyers going cold after a viewing
- ✓ Coaching insights that help each agent close more deals

MEASURE

Promises kept

Follow-up after viewings

Lead-to-visit rate

**E-commerce & retail**

EVERY REQUEST ANSWERED

THE PROBLEM

Exchange requests and complaints missed in voice notes; supplier delays nobody chases; cash-on-delivery parcels refused.

🕒 *A customer of an Instagram fashion brand sends a voice note to exchange a size. Nobody answers; she refuses the cash-on-delivery parcel.*

Egypt's Consumer Protection Agency received over 31,600 e-commerce complaints in 2024 [Business Today Egypt]; 63% switch after one bad experience [Zendesk 2025].

WHAT ROZ DOES

- ✓ Puts voice notes in writing, so no request is missed
- ✓ Reports complaints and exchange requests waiting too long
- ✓ Reports supplier delays from your supplier chats and groups

MEASURE

Complaint reply time

Refused COD parcels

Supplier delays caught

**Automotive**

SHOWROOM AND SERVICE IN SYNC

THE PROBLEM

Leads get no personal reply; service customers are never updated; WhatsApp quotes don't match the showroom.

🕒 *A Cairo dealer's advisor quotes a premium on WhatsApp that doesn't match the showroom; in service, a customer told "Thursday" never hears back.*

19% of US dealerships failed to reply personally to website customers [Pied Piper 2025]; staff didn't offer an appointment on 23% of service calls [Pied Piper 2025].

WHAT ROZ DOES

- ✓ Reports sales leads without a personal reply
- ✓ Shows service customers waiting for an update
- ✓ Coaching insights toward consistent, on-time answers

MEASURE

Lead reply time

Service updates sent

Test-drive-to-sale rate

8 How Roz starts with you

No build and no setup time. Log in to your GenuDo account, scan a QR code from each company WhatsApp number, and Roz is on the job the same day. Your account manager looks after the relationship with you.

Log in
Your GenuDo account, on the web or the app.

Scan the QR code
WhatsApp → Linked devices, on each company number.

Chats and groups linked
One-to-one chats and WhatsApp groups, from that moment on.

Ask and schedule
In Claude or ChatGPT, connected to GenuDo.

Your dashboard
Built around what your business needs to see.

WHO	THEIR PART
 You, the business owner	Link your company numbers, decide what you want to know and when, and act on what the reports show.
 Your GenuDo account manager	Your point of contact: looks after the relationship and reviews with you what Roz shows.
 Claude or ChatGPT	Your AI assistant, connected to GenuDo: answers questions, runs scheduled reports and builds dashboards.
 Roz	Connected to your numbers and groups; keeps every conversation ready for your questions and reports.

What Roz works with

One QR scan
Each company number links from WhatsApp → Linked devices.

Chats and groups
One-to-one chats and WhatsApp groups on the numbers you link.

Claude or ChatGPT
Ask about any conversation, in plain language.

Scheduled reports
Daily or weekly, at the time you choose.

Your own dashboards
Built around the insights your business needs.

Categories when you decide
Sort customers into categories, or move them to stages, through Claude or ChatGPT — never automatically.

9 Our first 90 days together

What changes, and when, counted from the day you scan the QR code. There is no build phase: value starts with the first report.

WHAT WE MEASURE	HOW WE READ IT	TODAY	TARGET	REVIEWED
 Team response time	Median time to reply, per number			Weekly
 Customers left waiting	Chats past your target time without a reply			Weekly
 Stalled deals	Deals in the reports, and how many were saved			Weekly
 Report items acted on	Share of report items your team resolved			Monthly
 Coaching	Repeated issues falling, number by number			Monthly
 Owner hours	Time you spend checking chats each week			Monthly

 What Roz needs from you

One QR scan from each company number; the questions you want answered and when you want your reports; who receives them; and a short note to your team, so everyone knows Roz is there to help.

 What you get from GenuDo

Roz on your numbers from day one, with no setup; GenuDo connected to Claude or ChatGPT for questions, scheduled reports and dashboards; and an account manager who looks after the relationship with you.

10 A note from Roz

To the owner of the business I'm about to join,

Thank you for reading my profile. You can't sit beside every member of your team, and you shouldn't have to read their chats at midnight to know your customers are cared for. That's my job.

Here is what I'll give you: every conversation on your company numbers and groups on record, an answer whenever you ask, and reports on your schedule — who waited, what stalled, and what will help your team win more.

Here is how we'll know it's working: we'll write down today's numbers together — response times, customers left waiting, stalled deals — and review them every month with your account manager.

I start the day you scan the QR code. Within the first week, your reports will show you what you couldn't see before. Let's make every conversation count.

Roz

Your AI quality control employee

Your GenuDo account manager

Your point of contact, reviewing results with you

What I give

Every company chat and group on record, answers when you ask, and reports on your schedule.

How we measure it

Response times, customers left waiting and deals saved — against today's numbers.

When you see it

Day 1 after the QR scan, week 1 in your first reports, month 1 in your team's response times.
